Dear Sir,

I have herd about what you and your Company plan to do in my town. I have herd what damage it did to Youngstown and Susquanna Township. Giving to the fact that there are 80 to 90 year old water pipes, gas lines, and sewer lines under the City and nearly 100 year old buildings on the surface. Not to mention the old Coal mines that are under the City that can cave in when your Company sets off your explosives and create sinkholes bigger than the ones in Rochester and Florida. What I am worried about is what happens if your "small explosives" damage a gas line and blow up half the City or you cause one of the old Coal mines collapse and a entire neighborhood cave in. To the residents that allow you to do this under their property I have one thing to tell you. I hope you and your Company know what your doing because not only are innocent citizens properties and our gas, sewer, and water systems on the line, but peoples lives are on the line too.

Also if some accident is to happen when your Company is Conducting this project will your Company Cover and reimburish the VICtems for their damages or leave the Cost to the owners and move on to the next City and not think twice about what you did.

In Conclusion I am going to say plain out that I disapprove and am totally agenst your Company doing this in my City's And if you are allowed to do this project in my City I pray that you know what you are doing and don't damage or destroy Aliquippa because I live here and my family and friends do too and we dont want to have to leave because something happened. Thank you for your time and Consideration.

Sincerly,

Cayden Rosa
